Contents of Volume 110

Number 1, 7 September 1984

SMITH, S. J., LAWRENCE, D. N. and NOBLE, G. R., An Immune Response Profile Model for Immunogenicity Quantitation . 1

WEST, I. C. and PAGE, M. G. P., When is the Outer Membrane of *Escherichia coli* Rate-limiting for Uptake of Galactosides? . 11

MÜLLER-HEROLD, U., A Fully Specified Model of a Non-linear Hypercycle 21

BARNARD, C. J., Stasis: A Coevolutionary Model 27

MASSALDI, H. A., The Physico-chemical Mechanism of Mediated Transport II. Osmotic and Isosmotic Volume Flow . . 35

SÝKORA, P., The Discrepancy Between *in vivo* and *in vitro* Experiments with Polycyclic Aromatic Hydrocarbon(PAH)Carcinogens: a Hypothetical Explanation 59

SOLOVYOV, V. V. and KOLCHANOV, N. A., A Simple Method for the Calculation of Low Energy Packing of α-Helices—A Threshold Approximation. I. The use of the method to estimate the effects of amino acid substitutions, deletions and insertions in globins 67

HEJNOWICZ, Z. and ROMBERGER, J. A., Growth Tensor of Plant Organs 93

HONDERICH, T., The Time of a Conscious Sensory Experience and Mind–Brain Theories 115

LETTER TO THE EDITOR

GRAY, B. F. and GONDA, I., A Comment on "Some Aspects of the Role of Quantum Mechanics in the Theory of Muscle Contraction" 131

Number 2, 21 September 1984

KHAIT, A. and SEGEL, L. A., A Model for the Establishment of Pattern by Positional Differentiation with Memory 135

CHEVERUD, J. M., Quantitative Genetics and Developmental Constraints on Evolution by Selection 155

BRIEDIS, D. and SEAGRAVE, R. C., Energy Transformation and Entropy Production in Living Systems I. Applications to Embryonic Growth 173

LUNDSTRÖM, I. and ELWING, H., Stereospecific Binding Capacity of Proteins on Surfaces—Simple Mathematical Models . . 195

PALMER, A. R. and PINDER, A. C., The Directionality of the Frog Ear Described by a Mechanical Model 205

REGELMANN, K., A Remark on the Theory of Risk-sensitive Foraging 217

HARA, T., Dynamics of Stand Structure in Plant Monocultures . 223

CARACO, T. and WHITTAM, T. S., Immigration-Extinction Competition on Islands: Associations Among Three Species . . . 241

SITARAM, B. R. and VARMA, V. S., Statistical Mechanics of the Gompertz Model of Interacting Species 253

LAUFFENBURGER, D., GRADY, M. and KELLER, K. H., An Hypothesis for Approaching Swarms of Myxobacteria 257

NUR, N. and HASSON, O., Phenotypic Plasticity and the Handicap Principle 275

JOHNSON, B. F., CALLEJA, G. B. and ZUKER, M., Mating-Type Gene Switching in a Homothallic Fission Yeast 299

LETTER TO THE EDITOR

PICKARD, W. F., The Self-Thinning Rule 313

Number 3, 7 October 1984

REANNEY, D. C., RNA Splicing as an Error-Screening Mechanism 315

BERNSTEIN, H., BYERLY, H. C., HOPF, F. A. and MICHOD, R. E., Origin of Sex 323

PELLIONISZ, A. J., Coordination: a Vector-Matrix Description of Transformations of Overcomplete CNS Coordinates and a Tensorial Solution Using the Moore–Penrose Generalized Inverse 353

JOHN, P., Mitochondrial Regulation of Cell Surface Components in Relation to Carcinogenesis 377

PALTRIDGE, G. W., DENHOLM, J. V. and CONNOR, D. J., Determinism, Senescence and the Yield of Plants 383

HIRSH, A. G., On the Possibility of the Production of Many Rare Proteins by Higher Eukaryotes 399

VAN DER HOEVEN, N., A Mathematical Model for the Co-existence of Incompatible, Conjugative Plasmids in Individual Bacteria of a Bacterial Population 411

LAWS, E. A., Improved Estimates of Phytoplankton Carbon Based on ^{14}C Incorporation into Chlorophyll *a* 425

PINTER, R. B., Adaptation of Receptive Field Spatial Organization via Multiplicative Lateral Inhibition 435

WRIGHT, B. E., Constraints on the Models of a Carbohydrate Metabolism in the Two Cell Types of *Dictyostelium discoideum* . . 445

SHULL, G. E., Differential Inhibition of Protein Synthesis: A Possible Biochemical Mechanism of Thalidomide Teratogenesis . . 461

NICKERSON, K. W., A Hypothesis on the Role of Pressure in the Origin of Life 487

LETTER TO THE EDITOR

BOON, J.-P., Model for Approaching Colonies . . . 501

Number 4, 21 October 1984

SANYAL, N. K., ROYCHOUDHURY, M. and OJHA, R. P., Molecular Basis of Drug Action of Some Antibiotics 505

SITARAM, B. R. and VARMA, V. S., Information Content and One Point Mutations in DNA 523

BURNETT, L., BASTEN, A. and HENSLEY, W. J., Complementary Relationship between Repetitive Sequences in the SV40 Early Gene Pre-promoter Enhancing Region and Big-T Antigen Splice Junction Exons 533

Bourne, I. H. J., An Hypothesis Concerning the Role of the Golgi Apparatus in the Phenomenon of Memory 541

Colombini, M., A Novel Mechanism for Voltage Control of Channel Conductance 559

Nagata, C. and Aida, M., *Ab Initio* Molecular Orbital Study of the Interaction of Li^+, Na^+ and K^+ with the Pore Components of Ion Channels: Consideration of the Size, Structure and Selectivity of the Pore of the Channels 569

Lara, R., Carmona, M., Daza, F. and Cruz, A., A Global Model of the Neural Mechanisms Responsible for Visuomotor Coordination in Toads 587

Tanaka, M., A Physical Characterization of Biological Information and Communication System Model of Ecosystems . . 619

Kimmel, M., Darzynkiewicz, Z., Arino, O. and Traganos, F., Analysis of a Cell Cycle Model Based on Unequal Division of Metabolic Constituents to Daughter Cells during Cytokinesis 637

Aron, J. L. and Schwartz, I. B., Seasonality and Period-doubling Bifurcations in an Epidemic Model 665

Letter to the Editor

Reiner, B. S., Cyclic Permutations in the Genetic Code, the 4×4 Magic Square and the Antiparallelism of DNA . . 681

Index to Volume 110

Adaptation of receptive field spatial organization via multiplicative lateral inhibition, 435
AIDA, M. (see NAGATA, C.), 569
Amino acid substitutions, deletions and insertions in globins, use of a simple method for the calculation of low energy packing of α-helices to estimate the effects of, 67
Antibiotics, molecular basis of drug action of, 505
Antiparallelism of DNA, cyclic permutations in the genetic code, the 4×4 magic square and (letter), 681
Approaching colonies, model for (letter), 501
Approaching swarms of myxobacteria, an hypothesis for, 257
ARINO, O. (see KIMMEL, M.), 637
ARON, J. L. and SCHWARTZ, I. B., Seasonality and period-doubling bifurcations in an epidemic model, 665

Bacterial population, a mathematical model for the co-existence of incompatible, conjugative plasmids in individual bacteria of, 411
BANARD, C. J., Stasis: a coevolutionary model, 27
BASTEN, A. (see BURNETT, L.), 533
BERNSTEIN, H., BYERLY, H. C., HOPF, F. A. and MICHOD, R. E., Origin of sex, 323
Bifurcations, period-doubling, in an epidemic model, seasonality and, 665
Big-T antigen splice junction exons, complementary relationship between repetitive sequences in the SV40 early gene pre-promoter enhancing region and, 533
Binding capacity, stereospecific, of proteins on surfaces; simple mathematical models, 195
Biochemical mechanism of thalidomide teratogenesis, and differential inhibition of protein synthesis, 461
Biological information and communication system model of ecosystems, a physical characterization of, 619
BOON, J.-P., Model for approaching colonies (letter), 501
BOURNE, I. H. J., An hypothesis concerning the role of the Golgi apparatus in the phenomenon of memory, 541
Brain–mind theories, and the time of a conscious sensory experience, 115
BRIEDIS, D. and SEAGRAVE, R. C., Energy transformation and entropy production in living systems I. Applications to embryonic growth, 173
BURNETT, L., BASTEN, A. and HENSLEY, W. J., Complementary relationship between repetitive sequences in the SV40 early gene pre-promoter enhancing region and big-T antigen splice junction exons, 533
BYERLY, H. C. (see BERNSTEIN, H.), 323

CALLEJA, G. B. (see JOHNSON, B. F.), 299
CARACO, T. and WHITTAM, T. S., Immigration-extinction competition on islands: associations among three species, 241

Carbohydrate metabolism in the two cell types of *Dictyostelium discoideum*, constraints on the models of, 445
Carbon, phytoplankton, improved estimates of, based on ^{14}C incorporation into chlorophyll *a*, 425
^{14}C incorporated into chlorophyll *a*, improved estimates of phytoplankton carbon based on, 425
Carcinogenesis, mitochondrial regulation of cell surface components in relation to, 377
Carcinogens, polycyclic aromatic hydrocarbon (PAH), a hypothetical explanation of the discrepancy between *in vivo* and *in vitro* experiments with, 59
CARMONA M. (see LARA, R.), 587
Cell cycle model based on unequal division of metabolic constituents to daughter cells during cytokinesis, 637
Cell surface components, mitochondrial regulation of, in relation to carcinogenesis, 377
Channel conductance, a novel mechanism for voltage control of, 559
Channels, ion, molecular orbital study of the interaction of Li^+, Na^+ and K^+ with the pore components of; the size, structure and selectivity of the pore of the channels, 569
CHEVERUD, J. M., Quantitative genetics and developmental constraints on evolution by selection, 155
Chlorophyll *a*, improved estimates of phytoplankton carbon based on ^{14}C incorporation into, 425
Coevolutionary model for stasis, 27
Co-existence of incompatible, conjugative plasmids in individual bacteria of a bacterial population, a mathematical model for, 411
COLOMBINI, M., A novel mechanism for voltage control of channel conductance, 559
Colonies, approaching, model for (letter), 501
Communication system model of ecosystems, a physical characterization of biological information and, 619
Competition, immigration-extinction, on islands: associations among three species, 241
Conductance, channel, a novel mechanism for voltage control of, 559
CONNOR, D. J. (see PALTRIDGE, G. W.), 383
Conscious sensory experience, the time of, and mind-brain theories, 115
Coordination: a vector-matrix description of transformations of overcomplete CNS coordinates and a tensorial solution using the Moore-Penrose generalized inverse, 353
Coordination, visuomotor, in toads, a global model of the neural mechanisms responsible for, 587
CRUZ, A. (see LARA, R.), 587
Cycle, cell, model based on unequal division of metabolic constituents to daughter cells during cytokinesis, 637
Cyclic permutations in the genetic code, the 4×4 magic square and the antiparallelism of DNA (letter), 681
Cytokinesis, analysis of a cell cycle model based on unequal division of metabolic constituents to daughter cells during, 637

DARZYNKIEWICZ, Z. (see KIMMEL, M.), 637
DAZA, F. (see LARA, R.), 587
DENHOLM, J. V. (see PALTRIDGE, G. W.), 383
Determinism, senescence and the yield of plants, 383
Developmental constraints on evolution by selection, quantitative genetics and, 155
Dictyostelium discoideum, constraints on the models of a carbohydrate metabolism in the two cell types of, 445
Differential inhibition of protein synthesis: a possible biochemical mechanism of thalidomide teratogenesis, 461
Differentiation, positional, with memory, a model for the establishment of pattern by, 135
Directionality of the frog ear described by a mechanical model, 205
DNA, cyclic permutations in the genetic code, the 4×4 magic square and the antiparallelism of (letter), 681
DNA, information content and one point mutations in, 523
Drug action of some antibiotics, molecular basis of, 505
Dynamics of stand structure in plant monocultures, 223

Ear, frog, directionality described by a mechanical model, 205
Ecosystems, a physical characterization of biological information and communication system model of, 619
ELWING, H. (see LUNDSTRÖM, I.), 195
Embryonic growth, and energy transformation and entropy production in living systems, 173
Energy transformation and entropy production in living systems. Applications to embryonic growth, 173
Entropy production and energy transformation in living systems. Applications to embryonic growth, 173
Epidemic model, seasonality and period-doubling bifurcations in, 665
Error-screening mechanism, RNA splicing as, 315
Escherichia coli, when is the outer membrane rate-limiting for uptake of galactosides?, 11
Eukaryotes, higher, on the possibility of the production of many rare proteins, by, 399
Evolution by selection, quantitative genetics and developmental constraints on, 155
Extinction-immigration competition on islands: associations among three species, 241

Fission yeast, homothallic, mating-type gene switching in, 299
Flow, volume, osmotic and isosmotic; the physico-chemical mechanism of mediated transport, 35
Foraging, risk-sensitive, a remark on the theory of, 217
Frog ear directionality described by a mechanical model, 205

Galactosides, when is the outer membrane of *Escherichia coli* rate-limiting for uptake of?, 11
Gene switching, mating-type, in a homothallic fission yeast, 299

Genetic code, cyclic permutations in, the 4×4 magic square and the antiparallelism of DNA (letter), 681
Genetics, quantitative, and developmental constraints on evolution by selection, 155
Global model of the neural mechanisms responsible for visuomotor coordination in toads, 587
Globins, use of a simple method for the calculation of low energy packing of α-helices to estimate the effects of amino acid substitutions, deletions and insertions in, 67
Golgi apparatus, hypothesis concerning the role of, in memory, 541
Gompertz model of interacting species, statistical mechanics of, 253
GONDA, I. (see GRAY, B. F.), 131
GRADY, M. (see LAUFFENBURGER, D.), 257
GRAY, B. F. and GONDA, I., A comment on "Some aspects of the role of quantum mechanics in the theory of muscle contraction" (letter), 131
Growth, embryonic, and energy transformation and entropy production in living systems, 173
Growth tensor of plant organs, 93

Handicap principle and phenotypic plasticity, 275
HARA, T., Dynamics of stand structure in plant monocultures, 223
HASSON, O. (see NUR, N.), 275
HEJNOWICZ, Z. and ROMBERGER, J. A., Growth tensor of plant organs, 93
α-Helices, a simple method for the calculation of low energy packing of; a threshold approximation; use of the method to estimate the effects of amino acid substitutions, and insertions in globins, 67
HENSLEY, W. J. (see BURNETT, L.), 533
HIRSH, A. G., On the possibility of the production of many rare proteins by higher eukaryotes, 399
Homothallic fission yeast, mating-type gene switching in, 299
HONDERICH, T., The time of a conscious sensory experience and mind-brain theories, 115
HOPF, F. A. (see BERNSTEIN, H.), 323
Hypercycle, non-linear, a fully specified model, 21

Immigration-extinction competition on islands: associations among three species, 241
Immune response profile model for immunogenicity quantitation, 1
Immunogenicity quantitation, an immune response profile model for, 1
Information, biological, and communication system model of ecosystems, a physical characterization of, 619
Information content and one point mutations in DNA, 523
Inhibition, differential, of protein synthesis: a possible biochemical mechanism of thalidomide teratogenesis, 461
Inhibition, lateral, multiplicative, adaptation of receptive field spatial organization via, 435
Ion channels, molecular orbital study of the interaction of Li^+, Na^+ and K^+ with the pore components of; the size, structure and selectivity of the pore of the channels, 569

Islands, immigration-extinction competition on; associations among three species, 241
Isosmotic and osmotic volume flow. The physico-chemical mechanism of mediated transport, 35

JOHN, P., Mitochondrial regulation of cell surface components in relation to carcinogenesis, 377
JOHNSON, B. F., CALLEJA, G. B. and ZUKER, M., Mating-type gene switching in a homothallic fission yeast, 299
